

A new single unified policy for SMEs

In association with Composite Legal Expenses, First Recovery Professional Edition is a unique risk management insurance policy which combines three essential elements to provide complete peace of mind:

- ⊕ All organisations should have a Disaster Recovery Plan. BRIO (Business Recovery Information Online) is the industry's easiest to use and most powerful DR planner — delivered direct to your phone.
- ⊕ More than 10,000 customers across the UK rely on First Recovery to provide emergency DR services, so when the worst happens, real help is available within one working day.
- ⊕ In the aftermath of a major loss our fully-qualified experts will handle all aspects of the preparation, submission and negotiation of a claim. Professional fees are met by the Policy when activated by a loss greater than £25,000 and/or a First Recovery mobilisation, and is most suited to organisations with a turnover up to £25m.
